

Together,
Let's go digital

Ground-breaking digital solutions
to boost your point of
sales' performance

ABOUT

WeDev

We Dev is the Coventeam Group's IT development branch.

Created in 2017, WeDev is an innovative start-up, bringing together the talents needed to design the digital solutions of tomorrow: accessible in 1 click, easy to use, ergonomic, mobile and business-oriented.

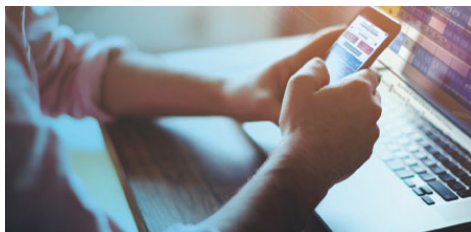

These high-added value solutions can process and use a large volume of data, and manage complex business rules. They are "opensource" to remain scalable and agile.

Based in Lyon and growing, WeDev gathers a team of R&D engineers, specialized in custom and new generation software programming, at the service of point of sale network performance, in France and abroad.

OUR SOLUTIONS

Ground-breaking digital solutions to boost your point of sales' performance.

Based on the OSWEDEV operating system, these solutions are interfaceable, secure, deployable on a large scale and already used by major Retailers and Automotive groups.

Planning and time management solution

A smart, modular resource planning solution (planning, bonuses, TAM, Dashboard), designed for in-store employees and accessible on smartphone.

Performance management solutions

Tailor-made BI solutions to manage and drive performance on site, deployable in France and abroad, on PC, tablet and smartphone. In 1 click, you can access your Key Performance Indicators and define action plans.

Program roll-out management solutions

Tailor-made solutions to support the deployment of animation programs within point of sale networks: planning of on-site visits, reporting, process audits, performance management.
